EXPERIENCE

3D Generalist and Character Animator | Butterfly Marionette September 2025 – December 2025

- Modeled a low-poly character in Maya using UV meshing from hand-drawn front and side profile character sheets, maintaining design fidelity across multiple rendering passes
- Built, maintained, and debugged CG character animation rigs to support expressive, mechanically accurate motion; employed strategic lighting and ambient occlusion to create an ethereal atmosphere

Level Designer & Artist | Ninja Penguin Platformer June 2025 – December 2025

- Designed and laid out tile-based levels in Unity for a 2D platformer, crafting player pathing and spatial flow to guide a penguin's journey home across multiple stages
- Created original art and sprites to visually reinforce the game's narrative, maintaining a cohesive aesthetic across level environments
- Collaborated with a small team to weave a story-driven narrative into the level structure, ensuring the emotional arc of the journey was felt through gameplay progression

Gameplay Programmer | Grayscale - Puzzle Game March 2025 – June 2025

- Designed and laid out 2D puzzle levels in Unity, including hidden page, Caesar cipher, and locked door puzzles, mapping player flow and pathing to ensure intuitive player progression
- Collaborated on puzzle logic and sequencing with a small team, authoring design documents that translated high-level concepts into concrete, buildable gameplay moments
- Wove narrative beats into level layouts, ensuring puzzle placement reinforced the game's story and emotional pacing
- Programmed gameplay systems in Unity (C#), including a drag-and-drop puzzle system using hitboxes and input logic, collaborating across designers, engineers, QA, and artists
- Conducted 2+ rounds of playtesting to evaluate puzzle clarity and difficulty, gathered player feedback, and iterated on level design and pacing across multiple review rounds

SKILLS

3D / CG Tools: Maya, Substance Painter, Arnold (AI Standard Surface), Unreal Engine, Unity

Rendering & Compositing: Arnold Rendering, Ambient Occlusion, Lighting, UV Mapping, Texture Baking

Programming: C++, C#, C, Python, Java, JavaScript, TypeScript, Assembly (RISC-V)

Design & Prototyping: Figma, Adobe Photoshop, Illustrator, InDesign, After Effects, Miro

Development: React, Node.js, MongoDB, Firebase, SQL, Tailwind, GitHub

EDUCATION

California Polytechnic State University, San Luis Obispo

San Luis Obispo, CA

Bachelor of Science, Software Engineering

September 2022 - June 2026

Double Minor in *Computing for Interactive Arts* and *Graphic Communication*

Relevant Course Work: Interactive Entertainment Engineering, Digital 3D Modeling and Design, Foundation of Digital Art I & II, Introduction to Graphic Communication
